### OBJECTIVE

---

Front-End Developer passionate about building responsive, user-friendly web applications. Skilled in modern web technologies and focused on creating clean, efficient, and visually appealing interfaces. Dedicated to improving user experience and collaborating with teams to deliver high-quality digital products.

### EDUCATION

---

Bachelor of Computer Science, CIS - New Cairo Academy

Present  
New Cairo, Egypt

### Professional Experience

---

Cloud Computing Engineer Intern | EJADA

Aug 2026 | Present

Joined EJADA as a Cloud Computing Engineer Intern, gaining hands-on experience in cloud computing, cloud infrastructure, and related technologies while supporting the design and deployment of scalable, reliable systems. Worked with Infrastructure as Code (IaC) to provision and manage cloud infrastructure, contributing to modern DevOps practices.

Frontend developer | RebusAI

Aug 2025 | Present

Collaborated with a development team to design and develop the main RebusAI website and several client platforms, including IWB for mentors and Phrise. Built responsive and user-friendly interfaces and integrated Firebase for backend services such as authentication and data handling.

### PROJECTS

---

#### IWB – Mentorship Platform (RebusAI)

- A modern mentorship platform connecting mentors and mentees with session and messaging management.
- Developed responsive and high-performance user interfaces using **Next.js**, ensuring a smooth experience across devices.
- Built a mentor dashboard to manage sessions, messages, and interactions with mentees.
- Developed a real-time notification system to keep mentors and mentees updated about new messages, session updates, and important platform activities

- Integrated **Firebase** services for authentication, real-time database operations, and backend functionality.
- Used TypeScript for type-safe development to improve maintainability and reduce runtime errors.
- Used **Zod** with **React Hook Form** to implement robust form validation, enhancing user input reliability and developer efficiency.
- Integrated **Tankstack** for advanced data management and seamless backend communication.
- Designed modern and accessible UI components using **Tailwind CSS** and **Shadcn UI**.
- Contributed to building a production-ready platform currently used as a live website.

### **Terra LC – Landscape Consultancy Website (Freelance)**

- A professional corporate website for a landscape consultancy firm offering smart irrigation, construction supervision, and training services.
- Built a fully responsive, multi-page website using **Next.js** for server-side rendering and optimized routing.
- Styled modern and accessible UI components with **Tailwind CSS** and **Shadcn UI**, delivering a clean and professional design.
- Integrated **Firebase** for backend services including contact form handling and data management.
- Implemented **internationalization (i18n)** to support both Arabic and English languages, including full **RTL (right-to-left) layout** support for Arabic, improving accessibility and reaching a wider audience.
- Optimized the site for **SEO** using Next.js metadata API and locale-based routing per language, improving search engine visibility across regions.
- Developed dynamic project and services pages to showcase the client's portfolio and offerings.
- Optimized performance with Next.js image optimization and lazy loading for fast page load times.
- Delivered a production-ready live website currently serving real clients.

### **FreashCart (Route Academy)**

- A modern e-commerce web application
- Led the development of high-performance, responsive web interfaces using **Next.js**, delivering smooth and consistent user experiences across all
- Managed complex application states (cart, wishlist) using **Redux** Toolkit, ensuring seamless state flow and performance.
- Utilized **TypeScript** for type-safe development, reducing bugs and enhancing code maintainability
- Styled modern UI components with **Tailwind CSS** and **Shadcn UI**, creating elegant, responsive, and accessible interfaces.
- Used **Zod** with **React Hook Form** to implement robust form validation, enhancing user input reliability and developer efficiency.

- Implemented advanced filtering and search functionalities to improve data discoverability and enhance user experience.
- Implemented internationalization (**i18n**) to support both Arabic and English languages.

## Live Docs

- A real-time collaborative document editing web app.
- Built using **Next.js** for server-side rendering and optimized routing.
- Utilized **TypeScript** for type-safe development, reducing bugs and enhancing code
- Styled the UI with **Tailwind CSS** and **Shadcn UI** for clean, responsive, and accessible design.
- Integrated **Clerk** for authentication, user management, and secure access control.
- Implemented **Liveblocks** to enable real-time collaboration between multiple users.
- Supported multi-user document editing with cursor presence and live changes.
- Enabled secure sharing of documents with dynamic session-based access.
- Focused on performance and smooth UX across all devices and screen sizes.

## Tamyoze App (Freelance)

- A government management platform that enhances workflows and improves the user experience across multiple entities.
- Developed a responsive government management website using **Next.js** for server-side rendering and optimized routing.
- Styled the interface with **Tailwind CSS** and **Shadcn UI** for clean, modern, and accessible designs.
- Managed application state with **Redux Toolkit**, ensuring smooth user interactions and data consistency.
- Integrated **Tankstack** for advanced data management and seamless backend communication.
- Improved user experience and streamlined workflows for multiple government entities, enhancing overall efficiency.

## WEB DEVELOPMENT SKILLS
